Udemy: Cyber Security and Ethical Hacking

Assessment task for Omedia's internship

Volunteer Experience

Moderator at Bitcamp

Oct. 2020 – Active

Moderator at B2B Marketing

Sept. 2020 – Sept. 2020

LITTLE ABOUT MYSELF

I am Nika Nabakhteveli, 17 y.o from Tbilisi, Georgia. I am learning Web Development via the internet. 8 months ago I joined the Georgian Facebook Web Development mentoring group "BitCamp" and actively started learning the fundamentals of programming with JavaScript. I have many goals and interests in programming, but currently, I'm sticking with JavaScript and I am going to learn more about its frameworks and libraries. Since I'm interested in full-stack, the next target for now is PHP, to discover more about back-end and scripting languages. As for long-term goals: I'm fascinated by Software Engineering and after I will gain some valuable skills in Web Development, I will continue my career as a Software Engineer. For that, besides JavaScript, I am also learning Java with Stanford University's free course.
