Personal Projects

Random Quote Generator: This app was created using ReactJS, without any hooks, with class components. It generates random quotes from the hardcoded database by clicking the button.

Pomodoro clock: An app which makes it easier to manage time while doing certain tasks. A great tool to find work-rest balance. The app was created using ReactJS, without any external state management utilities.

Calculator: A ReactJS calculator, created using ReactJS only. All the state management happens within the react class component.

Bitcamp Drummer: A ReactJS application, which simply mimics the drum-like mechanic. Both mouse clicks or corresponding keyboard keys can be used to produce sound from the displayed keypad.

Markdown Previewer: A simple ReactJS application for displaying markdown(entered inside the left input box) to the right of screen.

TODO LIST: Simple ReactJS TODO APP which may come in handy for making a daily schedule.

Skills

Languages: Georgian (Native), English (Fluent), Russian(Fluent).

Tech Stack: HTML5, CSS3, JavaScript, ReactJS.
